

**Advice 35-2007 of the Scientific Committee of the FASFC: emerging chemical risks – emerging mycotoxins**

The Scientific Committee started a self tasking study on emerging chemical risks. Firstly, the concept of emerging chemical risks (ECR) is defined and the study of ECR is situated in the national and international context. A system of classification of emerging risks is established. Secondly, a case study on emerging mycotoxines is presented. The study is focused on emerging mycotoxins which are a subject of research in Belgium and in Europe. The Scientific Committee makes recommendations for the FASFC control plan and for scientific research on emerging mycotoxines.
